# deadlocking bolt

## Slimline - Key Overide DB25KO

The Alpro DB25KO key override model offers the same functionality as the standard DB25 with provision for a Euro profile cylinder as a means of mechanical override. The ultra-slim design of the DB25KO enables fixing into very narrow sections. An advanced microprocessor module provides power reduction allowing continuous operation without heat generation as well as automatic voltage regulation, dual monitoring and access control features.

#### **High Physical Security**

Holding force 1,000kg - automatic deadlocking Bolt throw 16mm

#### **Robust Construction**

All stainless steel bolt of 12.7mm diameter, linkages and springs. 3mm stainless steel faceplate and strike plates with fully enclosed mechanism.

#### **Maintained Key Override**

Using standard Euro profile cylinder case pierced both sides for operation either side.

#### **Versatile Installation**

Designed to provide concealed high security locking on any single or double action, hinged or sliding door in timber or metal for vertical or horizontal mounting.

#### **Slimline Dimensions**

280mm(L) x 25mm(W) x 42mm(D) Back box 230mm(L) x 22mm(W) x 42mm(D)

#### **Faceplates**

Radius

#### **Multiple Voltage Input**

Any voltage from 12v DC -10% to 24v DC +15%. Complete with built in transient and reverse polarity protection and continuously rated solenoid.

#### Low Current Consumption

Volts	Current - Activate	Current - Hold
		(after 200ms)
12v DC	1100mA	210mA
$24\sqrt{DC}$	1000mA	90m A

#### **Triple Monitoring**

Bolt, Door and Key position switches

#### **Built-in Access Control Module**

Automatic unlock period - 0, 3, 6 or 9 seconds Multiple auto relock function - PTL Multiple unlock function - PTO

#### **Accessories**

Stainless steel surface mount kit

#### **Approvals**

EN 61000-6-1 : 2007 EN 61000-6-3 : 2007

### Ordering Information/Specifications

#### **Built-in Access Control Module**

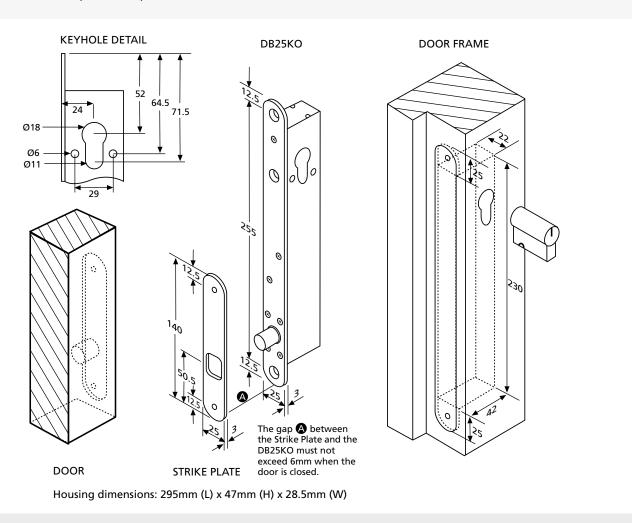

**Selectable unlock period** – a field selector timer once the bolt is signalled to unlock. This enables traffic exiting 0, 3, 6 or 9 seconds in which to open the door before it automatically relocks. See Anti-Tailgate.

**Multiple auto relock function** – when relocking the bolt makes 9 locking attempts over 18 seconds. Change in the Bolt Position Switch status indicates that the door has been locked. Fail open models only.

Multiple unlock – in fail secure mode 5 attempts to unlock door at 2 second intervals.

**Anti-Tailgate** – once the door has been pushed open and closed during the chosen unlock period, the bolt will immediately relock.
